vacuum

1/2 shell, or container with vacuum + sens. & fine "detector" fibers
on "sensing" things inside. That "notices" changes/fluctuations
presence in ambient environment. Like something
isn't there + "detector" remains neutral. Then that
Something comes, is present, or passes through, + detector
notes it + records it + alarms about it.

Site involves field of equipment, in rear area of vehicle
that can be removed or placed in it as necessary. Equipment can
be integrated w/ Vehicular system, but retains certain autonomy.
It involves some sort of "sensitivity" or shell, with a vacuum &
very sensitive 'detecting' or 'sensing' thing which notices
changes/fluctuations/presences in ambient environment that are
not humans detectable - at least in time to do something about
it -
